

DHILUSHAN SIVAKUMAR

Associate Software Engineer

Colombo, Sri Lanka.

| +94-772184107

| [Portfolio](#)

CAREER SUMMARY:

Final year BSc (Hons) Computer Science student at the Informatics Institute of Technology (IIT), affiliated with the University of Westminster. Interested in software engineering, web development, and artificial intelligence, with practical experience developing full stack web applications using React, JavaScript, Firebase, and SQL.

EDUCATION:

2023 – 2026 | Informatics Institute of Technology (Affiliated with University of Westminster, UK)
Bsc (hons) Computer Science

2022 | Informatics Institute of Technology (Affiliated with University of Westminster, UK)
Foundation in IT

2019 – 2022 | St. Peter's College, Colombo – O4
G.C.E Advanced Level (Commerce stream)

2018 | St. Peter's College, Colombo – O4
G.C.E Ordinary Level

WORK EXPERIENCE:

IN10NT Digital

UI / UX Designer Intern | Aug 2024 – Mar 2025

- Designed wireframes and UI prototypes in Figma for web and mobile applications, then translated feedback into frontend ready design assets for the development team.
- Contributed to building and refining frontend features, bridging the gap between design and implementation.
- Participated in design reviews and iterated on feedback to improve usability and visual consistency.

Cookers Oil

Software Engineer Trainee | Apr 2025 – Nov 2025

- Developed frontend modules for internal web tools and supported workflow efficiency across departments through responsive React and TypeScript implementation.
- Built responsive UI components using React and TypeScript while managing day-to-day administrative responsibilities.
- Coordinated cross-functional tasks and ensured smooth operations by combining technical and administrative capabilities.

RELEVANT PROJECTS:

EXPLORA – Travel Planning Web Application

Tech: ReactJS, TailwindCSS, Figma, Postman

- Led frontend development for a group travel planning web platform, building reusable React components and integrating RESTful APIs tested via Postman.
- Designed UI wireframes and prototypes in Figma, ensuring a seamless and intuitive user experience

Smart Travel Planner – Final Year Project

Tech: ReactJS, Python, Flask, NumPy, Scikit-learn, Firebase, REST APIs

- Designed and developed an end-to-end smart travel planning application, combining a responsive ReactJS frontend with a Python/Flask backend and integrated ML models.
- Built and trained machine learning models using Scikit-learn and NumPy to deliver personalised trip recommendations based on tourist preferences and behaviour.
- Integrated multiple third-party APIs to enrich trip planning with real-time data such as destinations, weather, and points of interest.
- Used Firebase for real-time database management and user authentication, enabling seamless data sync across the application.
- Delivered an all-in-one platform that significantly improved the efficiency of tourist trip planning through intelligent automation.

Email Spam Filter – ML Model

Tech: Python, Scikit-learn

- Developed a machine learning model to classify and filter spam emails with higher accuracy than benchmark solutions.
- Applied natural language processing (NLP) techniques and feature engineering to improve model precision and recall on real-world email datasets.
- Evaluated and compared multiple classification algorithms using Scikit-learn to identify the optimal approach for spam detection.

Edusity – Educational Frontend Website

Tech: ReactJS, GitHub, VS Code

- Developed a responsive education website in ReactJS using component based architecture to support scalability and maintainability.

Shopping Cart Management System

Tech: Java, Java Swing

- Built a desktop application with a graphical Java Swing interface for managing shopping cart operations.
- Implemented console based and GUI driven purchase handling for a smooth user experience.

Weather Mobile App UI

Tech: Figma

- Designed a neon themed mobile app UI for a weather application, focusing on modern aesthetics and usability.

SKILLS:

- Front-end and back-end web development
- Code structure and architecture
- Javascript
- React
- Python
- Java
- Communication
- Time Management
- Machine learning
- Problem solving
